

The Power of  
End-to-End  
Logistics  
Solutions  
with  
nVision Global

nVision Global®

THE NEW STANDARD FOR  
**FREIGHT  
OPTIMIZATION**

## Executive Summary

Supply chains are more complex than ever. Shippers juggle multiple vendors, fragmented systems, and siloed data, which leads to inefficiency, higher costs, and missed opportunities. nVision Global solves this by delivering a truly integrated ecosystem of freight management services and technology. From invoice audit and claims recovery to TMS, procurement, and analytics, we bring everything under one roof, so companies can manage freight spend, improve performance, and make smarter decisions with confidence.

## The Problem with Fragmentation

Most shippers face:

- **Disconnected systems:**

Different platforms for audit, TMS, claims, and analytics, with little communication between them.

- **Duplicate work:**

Multiple vendors mean duplicated data entry, overlapping processes, and unnecessary costs.

- **Limited visibility:**

Siloed tools restrict the ability to see total spend across modes, carriers, and regions.

- **Reactive decision-making:**

Without unified data, strategy is based on lagging indicators instead of real-time insights.

Fragmented systems don't just create inefficiencies, they keep shippers from seeing the full story. Without integration, costs rise, visibility shrinks, and decisions are made in the dark. The solution lies in bringing everything together.

## nVision Global's End-to-End Ecosystem

Our solutions work together seamlessly, supported by decades of expertise and a global footprint:

### CORE FREIGHT SOLUTIONS

- **Freight Audit & Payment:**  
Comprehensive, line-item invoice validation and global payment processing.
- **Impact TMS:**  
Multi-modal transportation management with planning, execution, and visibility in one platform.
- **Loss & Damage Claims:**  
Dedicated teams manage filing, follow-up, and resolution to maximize recovery.
- **AI Outlier Detection:**  
Identifies unusual spend patterns or operational anomalies before they impact costs.
- **Contract Management:**  
Identifies unusual spend patterns or operational anomalies before they impact costs.
- **Freight Spend Analytics:**  
Custom dashboards with insights into cost drivers, carrier performance, and trends.
- **Benchmarking:**  
Compare spend and service against global peers and industry standards.
- **Rate Procurement & Negotiation:**  
Data-backed sourcing and carrier bid management.
- **Routing Guide Development:**  
Optimized carrier allocations aligned to business priorities.
- **Modeling & Business Rules Integration:**  
Optimized carrier allocations aligned to business priorities.
- **Parcel Cost Optimization & Small Parcel Audit:**  
Tailored tools for high-volume parcel shippers.
- **OCR Data Capture, EDI, and API Development:**  
Seamless digital integration for accuracy, speed, and connectivity.

## Why End-to-End Matters:

- **Single Source of Truth:**  
One ecosystem eliminates conflicting data and redundant processes.
- **Smarter Decisions:**  
Integrated analytics inform procurement, budgeting, and operations with real-time intelligence.
- **Efficiency Gains:**  
Automation reduces manual effort while global teams handle exceptions and disputes.
- **Global Scalability:**  
Support across regions, currencies, and languages to match customers' global networks.
- **Lower Total Cost of Ownership:**  
One partner to manage audit, TMS, claims, analytics, and more, reducing vendor management overhead.

## Tangible Benefits For Customers:

Shippers leveraging nVision Global's end-to-end ecosystem realize:

- Cost control through optimized freight spend and prevention of overcharges.
- Operational agility with faster exception handling and real-time decision-making.
- Visibility and transparency across the entire supply chain, from shipment planning to invoice settlement.
- Future-ready strategy with scalable systems and predictive insights that grow with the business.

## Conclusion:

Logistics challenges won't be solved by fragmented, standalone systems. Success requires an integrated approach that connects freight audit, TMS, claims, procurement, and analytics into a unified ecosystem. With nVision Global, companies gain more than a vendor, they gain a strategic partner that delivers accuracy, intelligence, and end-to-end control of their global freight operations.
